

WATERWORKS FABRICATION ON TIME, UNDER BUDGET

Across the U.S., ductile iron and steel pipe remain the backbone of water and wastewater infrastructure. Every project requires precision and dependability, especially when custom spools are needed for tie-ins, retrofits, or field fit-ups. Rescue Engineers delivers fabricated pipe solutions that help California contractors and distributors keep water projects on track and under budget.

SELECTION INCLUDES:

FLANGE, GROOVED, OR PLAIN-END CONFIGURATIONS

FITTINGS & PIPE SPOOLS UP TO 16"

CERTIFIED TO ASME B31.1 & B31.3 STANDARDS

LINED & COATED WITH NSF 61-APPROVED MATERIAL

LET'S TALK

CUSTOM DUCTILE IRON SPOOLS

We produce custom ductile iron spools in flanged, grooved, or plain-end configurations up to 16" in diameter.

Fabrication in a controlled environment ensures consistent quality, dimensional accuracy, and faster delivery for your next installation.

*Larger sizes available upon request

**Custom lining and coating options available upon request

CUSTOM WELDED STEEL PIPE

Our ASME-certified fabrication team (B31.1 & B31.3) delivers high-quality welded steel pipe assemblies, available in flanged, grooved, or plain-end configurations up to 24".

Each spool can be lined and coated per project specifications to meet waterworks, wastewater, or industrial standards. Additional certifications are available upon request.

QUALITY. SPEED. SAVINGS.

Rescue Engineers is positioned to support large orders and specialty coatings with efficiency and precision. Our clients consistently realize on time delivery through streamlined fabrication, reduced field labor, and fewer change orders.
